

All serilor® squeegees are delivered with an authenticity label containing a copy-proof hologram

# serilor® screenprinting squeegees

## Universal squeegee

### serilor®SR1 & SR3

Universal color coded squeegee blades for all applications. Available in most colors, profiles and dimensions, in single, double and triple durometer.

## High resistance

### serilor®HR1 & HR3

High Resistance squeegees: for use with industrial and UV inks that require optimal abrasion and chemical resistance. Available in white color, in most profiles and dimensions, in single, double and triple durometer.

## Large format printing

### serilor®HR5

Designed for high tolerance and specialty printing: 5 layers of soft and hard high resistance polyurethane offer both rigidity for precision printing and softness to absorb vibrations. Available in graphic dimensions only with several elasticity modulus and printing edge hardnesses.

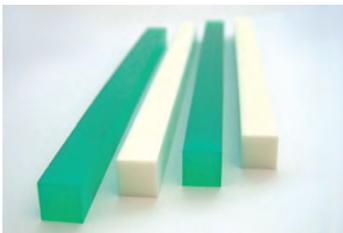

## Best value squeegees

### serilor®LC1 & LC3

A new polyurethane formulation developed to achieve performance at an attractive price; the right choice for all non critical applications ranging from textile to multi-purpose graphic printing. Available in standard (PO) profile with a straight, square edge, and color coded - in both single and triple durometer.

## Diamond square profile

### serilor®D

For high precision screenprinting applications such as pcb's, solar panels, CD's... Made in a superior abrasion and aggressive-inks resistant polyurethane, serilor®D blades offer a long life associated with a perfect knife-cut printing edge.

## Optical media printing

### serilor®CD

For optical media printing, packed in convenient ready-to-use pre-cut sizes. These blades offer 4 sharp cut edges for precision printing. Various sizes in single, double and triple durometer are available.

## Extra soft durometers

### serilor®CERAM

High Resistance squeegees in durometers ranging from 35 to 55sh as needed for the direct printing of ceramics or tiles. Also available with soft core and 75 shA edges for curved substrates (CERAM 3).

## High density printing

### serilor®TXS3

This 55/90/55shA triple durometer squeegee minimizes bending under pressure and is well-suited for depositing heavy ink layers such as "First down" whites, HD inks and gels, adhesive for foil, colors for simulated process, water base and discharge inks. For use in textile printing with manual or automatic equipment.

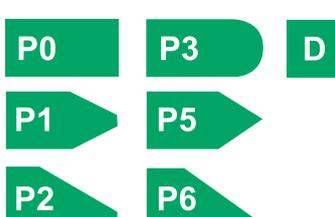

## «Antistatic» squeegee

### serilor®AS

Conductive polyurethane to help reduce static problems in screenprinting. Development product available as a special only.

## Squeegee profiles

**P0** : Straight square edge  
**P1** : Double bevel + flat land 60° angle + 1mm flat (±0,5mm)  
**P2** : Single bevel + flat land 45° angle + 1mm flat (±0,5mm)  
**P3** : Round bevel  
**P5** : Double bevel (V type)  
**P6** : Single bevel 45° angle  
**D** : «Diamond» square profile

# serilor® sharpeners & accessories

## serilor® HAND

Gold anodized squeegee holders for manual printing. Adapts to various squeegee sizes with no glue. Stiff, light, easy to maintain for life long use.

## serilor® CUT

Convenient tools for safely and cleanly cutting squeegee to length, reducing occupational hazards and improving handling of PU blades.

## serilor® MACH

Gold anodized squeegee holders for printing presses. 3 models and 2 heights fit all squeegee sizes and replace OEM models at a great value.

## serilor® CLIPPER

Convenient tool for safely rounding squeegee corners, to prevent mesh wear.

## serilor® SHORT CUT serilor® MAXI

Entry level, high precision diamond wheel sharpeners. No extra consumables needed. Low cost with excellent performance for small format sharpening (from 51 cm / 20 « up to 97 cm / 38»).

## serilor® DIAMOND FINE

Surpasses all other manual devices for consistent polishing of both squeegee edges simultaneously. Prevents strikes and early wear.

Optional wheels shapes available for all standard squeegees profiles

## serilor® MAXITRONIC    serilor® KUT    serilor® KUTRONIC

Affordable manual and automatic high precision large format sharpeners using diamond wheel technology. Models up to over 3.5 meters (138 inches). Over 1000 diamond sharpeners sold worldwide.

Optional wheels shapes available for all standard squeegees profiles
