Whether you are new to the industry or are an established business, this course will suit you.

Not just for beginners, the class is a ground up researched factual technical presentation

With answers to commonly faced problems, technical issues and costly methods, this course will teach you the fundamentals of the screen-printing process as well as technical tips and tricks which may help save time,

money and supplies.

These advanced industry tips and techniques will benefit every type of print shop, whether a new start up, a new direction for clothing designs or a veteran print shop.

Every student will have the opportunity to be involved in hands on learning of the entire print production cycle.

With every step of the training, there is an open forum to interact with both the trainer and your peers with plenty time to ask questions specific to your own businesses set up and situation.

You are encouraged to bring with you any preconceived technical questions to the class in order to take full advantage of the experience. We believe that open dialogue between the students and instructor will enhance the entire classroom experience.
