

Comfort FF White

- Incredible flash time.
- Softest feel.
- Great fiber lay-down.
- Smooth finish.

Comfort FF White is meant to be printed on expensive apparel. Vintage, tri-blend, pigment-dyed, and stone-washed tees could really be special with this new ink. That's not to say a regular heavy cotton shirt would not feel great with Comfort FF White printed on it. Actually, we expect you would want this feel on most cotton and poly/cotton tees.
