OLEC OLITE AL53 & AL83

The reflectors should be replaced every 3-5 years. Optimize the bulb energy while insuring uniformity. Bulb selection and prices are available at www.douthittcorp.com

Douthitt offers an easy way to insure the Olec lights are working properly and save future down time and costly repairs. Simply call us for a RGA and send the unit to Douthitt for evaluation and/or repair. Normal 1-2 day service!

Douthitt offers quick turn around factory service at in house rates, and all parts and labor are fully warranted.

Weak or non working fans, capacitors, and frayed wiring will cause major problems later but can be repaired economically by Douthitt.

All Olec Olite and Theimer Violux Bulbs* and Parts are in stock.

*Please keep in mind that we have bulbs for any application. However the Capacitor rocker switch on top of capacitor bank must be set accordingly, very important.

L1250 & L1280 Diazo (410nm – 420nm) Cap Switch 1
L1261 & L1281 Photopolymer (365nm – 385nm) Cap Switch 2
L1252 & L1282 Dual Cure (365nm – 420nm) Cap Switch 2

Computer to Screen and Exposure Units

Douthitt manufactures the high quality and robust hot melt wax jet that offers the best value and backed by the best customer service support! We also have exposure units and vacuum frames for any application.
