Product Description:

Triangle PFS is a non-phthalate plastisol ink for screen printing on textiles. It is a PVC based series formulated to direct print on apparel without having to change any standard screen printing procedures. It will perform the same as conventional ink without changing any standard equipment or adjusting application methods.

Product Features:

PHTHALATE-FREE: Compliant with CPSIA regulations.

EN71- Apparel printed with PFS for children's wear is compliant with EN71 Part 3: Specification for Migration of Certain types of Elements.

APEO'S (alkylphenol ethoxylates): Triangle Ink does not intentionally use nonylphenol ethoxylates (NPE), octylphenol ethoxylates (OPE) or alkylphenol ethoxylates (APEO) as a component in PFS inks. Our statement is based on the information provided to us by our suppliers and not by any in-house testing procedures.

Analytical Testing Summary:

St. Louis Testing Laboratories, Inc.

Member ACIL; accredited to CPSIA Section 108

CPSC-CH-C1001-09
